"THE TASK WILL BE GREATER IN 1941 THAN IT HAS BEEN IN 1940

... it is going to demand more effort, more sacrifice and far more change in our daily lives . . ." RT. HON. W. L. MACKENZIE KING

ALREADY the pattern and pace of life in Canada have undergone a profound change. Gaps in employment are rapidly filling up. Some 350,000 Canadians who were unemployed before the outbreak of war are now employed. Another 200,000 are with our armed forces. Factories, which until recently were turning out goods for civilian consumption, have been transformed into humming arsenals, pouring out instruments of war. Night and day shifts have become the rule rather than the exception. But the peak of effort is not yet in sight.

In 1941 still more factories will switch to war production... new plants will be established, thousands more will be employed. This rising tide of activity must continue until we reach the flood of effort when every Canadian will be employed and working to his utmost, every possible square inch of plant will be utilized, every wheel will be whirring in the race we are waging against time and the enemy.

More men are working . . . working longer hours . . . making more munitions . . . earning more money . . . producing more goods . . . putting more money into circulation. Most Canadians are sharing in this increased national wealth — have extra dollars in their pockets.

The effort the Prime Minister calls for is gaining momentum, but many Canadians, as individuals, have not yet felt the real pinch of sacrifice.

Canadians of all classes are sharing tax burdens, but it must be admitted that up to date the larger part of the money needed for Canada's war effort has come from business firms and individuals with large incomes. They are paying high taxes. They have already invested heavily in War Loan Bonds. This is not enough. The plain truth is that Canada's rapidly expanding production for war purposes will require increasing sums of money. That is why the Prime Minister warned Canadians in his New Year's broadcast that the year ahead demands more effort and more sacrifice.

(NEW YEAR'S EVE, 1940)

Every man, woman and child is asked to lend. Every dollar you lend will help to put another man in a job . . . making more munitions. Every dollar you lend may save a soldier's life . . . help to shorten the war. Small wage earners must carry their share of the burden, too.

No one need go without necessities, but you are urged to forego the purchase of unnecessary articles . . . however small the cost . . . no matter how well you are able to pay for them . . . which take labour and material away from the great task of providing goods needed to win the war.

This is your war. Everything you have : . . everything you believe in . . . is now at stake. This is a message to you . . . a challenge to every Canadian . . . a call to the colours . . . a call for volunteers.

Be sure to make provision to pay your Income Tax—payment is made easier by the new instalment plan. But be prepared to do more — budget your earnings to make sure that you will have money available to buy War Savings Certificates and to subscribe for War Loan Bonds. You will help Canada — you will help yourself.

the Wiley.

WORK-SAVE-LEND-for Victory

Wanted---Two Million Regular War Savers

One of the many features of the War Saving Certificates campaign to be launched in February is the emphasis placed on the number of Canadian citizens participating, rather than on the amount of money to be placed.

With some 200,000 voluntary workers combing the factories. offices stores and homes throughout the country during the month of February, there is little reason to doubt the successful end of the campaign: But more important than the announcement from Ottawa at the end of February that Capadians have pledged themselves to buy ten million dollars worth of certificates each month, will be the other announcement that two million loyal citizens are regularly participating in these pledges.

No one understands the real pleasure of home ownership until he has bought his own land and house. Similarly, a citizen of Canada cannot share in the true pride of Canada's achievement in this war until he has a personal financial stake in Canada's war effort.

The steady increase on one's holding in War Savings Certificates will steadily increase the pride of the individual in his country and what stands for.

General Motors of Ganada Will Build Twin Engine Bombers

Mr. C. E. Wilson, president of the General Motors Corporation. today announced completion of arrangements for extensive additional participation of the Corporation in the aviation defense program, calling for preparation to produce parts and sub-assemblies for 200 twin-engine bombers monthly and for increasing airplane engine production by 500 engines monthly to a total of 1,500 a month. This will involve an increase in the Corporation's employment, as the program reaches a peak, to 40,000 men in aviation alone. The Corporation is pushing this program ahead aggressively pending the working out of final contractual arrangements.

With the urgent need of bombers, it was announced that the Corporation will begin immediately preparation for the manufacture of parts and sub-assemblies for twin-engine B25 medium bombers which will be finally produced by North American Aviation Inc. It is expected that parts and assemblies will be in production in General Motors so that final assemblies can start by llate summer.

The Buick Motor Division of General Motors will erect an airplane engine plant with a capacity of 500 engines a month. The engines will be the Pratt and Whitney radial, air cooled type.

When negotiations now in proogress are completed the total -Buick contract for engines, spare parts, machine tools and all equipment will amount to approximately \$125,000,000. This includes \$24,313,150 already allotted by the Defense Plant Corporation for a plant and a \$36,-497,520 contract for engines and parts awarded by the War Department. This project alone, when it gets into full operation, will employ 10,000 men at the new plant. The time when production will start in this plant will depend on the date of delivery of special machine tool equipment.

W. R. THOMPSON, Whitewood, Sask.

Director, Agricultural Department North-West Line Elevators Association

At the Annual Conference of the Manitoba Agronomists an interesting and challenging paper was presented by M. J. Tinline and H. J. Siemens. Its title is "Changes and Readjustments in Manitoba Cropping Practices," but it has equal significance for residents of Saskatchewan and Alberta. The following is an abstract of the authors' introductory statements:

In view of the present wheat prob-im, this is an opportune time to accourage seeding down grasses and

Manitoba farmers have been grain mining their soil too long. Older countries have had to maintain a high percentage of their land in grasses and legumes in order to protect their soils. Manitoba farmers must follow this same policy or their soils will be ruined. Serious drifting over much of the province, sheet erosion and gullying of the undulating lands are only foretastes of more severe erosion yet to come.

Here endeth the quotation.

It is an interesting fact that, until quite recently, lectures and articles on crop rotations were considered to be of academic interest only. We believed that our prairie province soils were so abundantly fertile that they would never wear out. Now, we know better.

Vitamin B Much publicity has recently been afforded vitamin B, as a stimulator of plant growth. Dr. E. J. Kraus, of the University of Chicago, in an edthe University of Chicago, in an address before a joint meeting of the American Society of Agronomy and the Soil Science Society of America, on December 5, stated that most of the publicity was "just plain bunk."
